

Plugin Configuration

1. Unblock the zip file (right click on DisplayPole.zip file and click on Property, If you are able to see Unblock button then click on it, If you are not able to see 'Unblock' button then you are good)
2. Extract the zip file to plugin folder found at installation location "C:\Program Files (x86)\InventoryPlus\plugin"
3. Open the "AmazonSMS.dll.config" file on notepad,
 - a. Enter all configuration value accordingly based on Amazon SMS Service configurations.
4. Restart the InventoryPlus software if running.

Configuring the Amazon SMS service

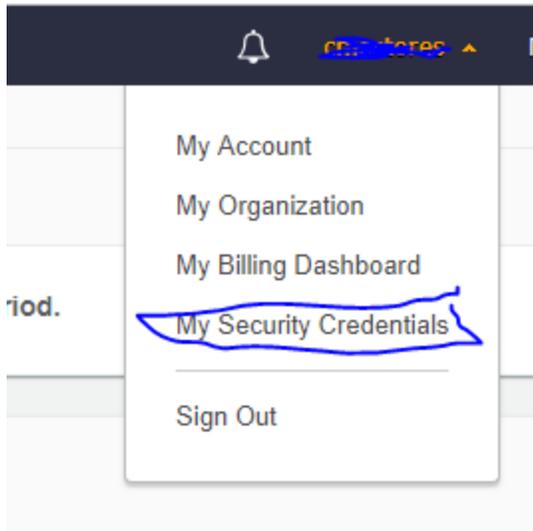

1. Goto URL <https://aws.amazon.com/sns/sms-pricing/>
2. Verify the SMS Price of your country. If price is reasonable then click on create "Create Free Account" button to start creating the account. Create the new account with your debit/credit card.
3. Go to "Simple notification service" from Services menu. It will be landing on the page <https://us-west-2.console.aws.amazon.com/sns/v3/home?region=us-west-2#/homepage>
4. Select the Region "US-West" (SMS Sending facility is available to only some reason, We have implemented for US-West regain only)

5. Enter the Text Messaging preference like Message type, sender id etc (Some country sender id may not works)

How to get the access key and secret key

1. Click on User name and click on My Security credentials.

2. If popup comes then click on continue to security credential button
3. Click on Access Key
4. Click on Button “ Create New Access Key” if there is no access key is created.

Note:

1. This plugin will works for only premium users.
2. Sender ID will works for some country, In case if there is any issues then it is required to contact Amazon SMS Service only.
3. If you are from India then no need to use this plugin, we have dedicated SMS ending facility. Contact support@inventoryplus.in for more details. We are providing the SMS service for only Indian’s user with assured Sender ID delivery.
